

Guinea

Travel Notice

Guinea experienced an outbreak of Ebola Virus Disease in the Forest Region in March 2014. The Government of Guinea, with the help of International partners including the Centers for Disease Control and Prevention (CDC) responded quickly to monitor and halt the spread of this disease, and to ensure that all necessary measures are taken to effectively control the further spread of the infection. Visit CDC's Ebola web page for more information.

The CDC website also provides valuable information on vaccinations and other health precautions. For information about outbreaks of infectious diseases abroad, consult the World Health Organization (WHO) website. The WHO website also contains additional health information for travelers, including detailed country-specific health information.
